Tim Baillie is a Chartered Civil Engineer with a range of construction project management experience gained in the delivery of major building and infrastructure projects in the United Kingdom.

Having gained over 15 years of experience working for design and build contractors, he has successfully delivered projects under various forms of contract.

Tim has extensive knowledge of the design, procurement, offsite manufacturing, construction, quality assurance/control and commissioning processes, allowing him to simplify complex projects.

He has also been responsible for developing and disseminating safety and temporary works procedures for the design and management of construction projects, to meet new and updated approved codes of practice, leading to improved health and safety outcomes.

Tim is recognised by Who's Who Legal in Consulting Experts - Construction - Quantum Delay & Technical 2023.

WWL says "Tim Baillie earns widespread endorsements for his "ability to convey big concepts and fine details in an equally clear way".

This expert has the following cross-examination experience:

- High Court
- Commercial Court
